

8,000 Happy Campers

Santa Rosa, California - In their pursuit to use sports to promote positive mental and physical development in today's youth, the National Academy of Athletics continues the fight to diminish childhood obesity by advocating healthy, active lifestyles. In 2018 they reached a new new milestone... 8,000 Happy Campers.

As of December 19, 2018, National Academy of Athletics is proud to announce that 8,000 boys and girls between the ages of 4 and 13 attended youth sports programs supported, managed or operated by the National Academy of Athletics. This is exciting growth! In 2017 the company provided services to 6,400 "happy campers". The company attributes their 20% growth on the quality of it's staff and coaches, consistent curriculum, exceptional relationships with each of their Community Partners and their customer service.

Through inspiration, perspiration and motivation the amazing team at the National Academy of Athletics provide quality youth sports programs in over 80 communities. Their team of Area Captains (Local Community Managers) partner with City Recreation Centers, Schools and Leagues to offer summer sports camps, school break clinics, physical education supplemental programs and after school programs. The National Academy of Athletics programs are booming throughout Northern California. With the expansion to San Diego in 2019 and newly appointed Area Captain to work with the Santa Clara communities, their projected growth will continue.

In addition to Rec Centers, Schools and Leagues, they also continue to increase partnerships with Boys & Girls Clubs and YMCAs. These municipalities are grateful to have the expertise of the NAofA to run and staff their sports programs.

"The National Academy of Athletics and their staff are incredibly knowledgeable and professional. After collaborating to identify our needs, we developed a comprehensive schedule that now includes 10 Leagues, Coaches Clinics, Parent Clinics, Players Clinics and Officials Clinics.

As a follow-up to our first league, with the support of the National Academy of Athletics, we increased participation by 64% and improved the overall experience for the various participants." Donovan D., Boys and Girls Club, Valley of the Moon.

It is foreseeable that National Academy of Athletics is on its way of becoming the largest and fastest growing youth sports organization in the nation.

Anyone interested in bringing any National Academy of Athletics program to their community should contact info@NAofA.us or visit NationalAcademyofAthletics.com.

About the National Academy of Athletics

The National Academy of Athletics provides high caliber youth sports & athletic programs and services to children, coaches and parents in partnership with city recreation departments, youth sports leagues and organizations, public and private schools and professional sports franchises.
